I'm Afnan Al-Zaity, a third-year software engineering student and a dedicated front-end developer with a passion for back-end development. I'm passionate about harnessing the power of these technologies to create innovative and effective software solutions.

Education

Bachelor's degree in Software Engineering, [Al-Azhar university of Gaza](#) 2022 – 2027 | Gaza, Palestine

I am pursuing a bachelor's degree in software engineering, and I am learning the principles of SOLID and Agile, in addition to algorithms, data structures, and many other things related to computer systems engineering.

Experience

Trainee at Gaza Sky Geeks, Python Programming Basics 6/July/2023 | Gaza, Palestine

During my internship, I immersed myself in learning the fundamentals of programming using the Python programming language, how to work with code, and how to solve programming problems.

Solving programming problems, data structures, and algorithms using C++ at Coach Academy online 10/2024 , Cairo, Egypt

I learned the basics of programming using the c++ language and how to solve problems on the VJudge platform, in addition to learning data structures and algorithms and how to use them and apply them to solve problems. I am still learning every day and solving programming problems on various websites.

Trainee at SEF Academy, Front End developer 10/2024 , online ,Egypt

I learned web design using HTML, CSS and JS and I am still learning and I also have ambition to continue in the Back End field.
